Met Office Aberdeen Meteorologist's View

Strong winds will be the main feature to consider with gusts of 70 to 90mph giving and serious and potentially dangerous conditions on high slopes. Sudden violent gusts will also affect low slopes at times.

Forecast for Sunday 27 Feb 2022

Weather: A band of rain, heavy at times with snow above 700m, will move in from the west overnight. The rain will become mostly light and patchy and will clear erratically northwestwards during the day. Outbreaks of rain, with snow on the Munro tops will then spread east during the evening.

Maximum wind: Southerly 50mph, gusts 80mph overnight, easing to 20mph gusts 30mph during the morning. Increasing again to southerly 40-50mph, gusts 75mph through the evening.

Chance of cloud-free hill tops above 800m: 20% in morning, improving to 70% in afternoon.

Low Cloud and visibility: Extensive cloud and fog above 500m in the morning with very poor visibility in snow on high slopes. Cloud breaking up through the afternoon leaving patchy summit cloud but becoming more extensive again in the evening. Away from cloud, often poor in the morning but becoming mainly good in the afternoon.

Temperature: **Glens:** Plus 5C rising to 7 or 8C.
At 800m: 0C to plus 1C.
Freezing level: 800m, rising to 1000m.
